Experience

Co-Founder & CTO May 2026 – Present
HYATLAS.AI *Mexico - Paris*

- Founded and scaled an AI appointment setter SaaS that automates Instagram, TikTok & WhatsApp DM sales for content creators & businesses to +10 paying clients and $15K MRR, leading a team of +5 people across 2000+ shipped commits.
- Architected the multi-tenant platform (Django, PostgreSQL, Celery/Redis, PgBouncer) integrating ManyChat, Calendly and multiple LLM providers to qualify leads, book calls and run AI pipelines end-to-end.
- Scaled production to 100K+ webhook requests/day and 21K+ inbound DMs/day (peak 11K webhook calls/hour, 3 req/s): tuned gevent workers and PgBouncer pooling, added Redis distributed locks and dedicated Celery queues, eliminating DB connection exhaustion and duplicate-message races.
- Cut LLM inference cost, and improved website & mobile performance by +50%.

IT Intern Sep. 2024 – April 2026
UDLAP *Puebla, Mexico*

- Designed and developed a full-stack document processing system for the IT department using React, TypeScript, and OpenRouter to automate recognition, classification, and data extraction of institutional documents.
- Engineered an OCR pipeline with opensource models for complex field extraction and batch processing of 50+ documents, reducing manual processing time by 85%.
- Built internal automation tools that streamlined document-handling workflows and reduced repetitive manual work across university operations.

Projects

QUE HAY PUEBLA | *Next.js, TypeScript, PostgreSQL, Prisma, Stripe, NextAuth* Dec. 2025 – Present

- Built a B2B SaaS platform for small businesses in Puebla, serving 100+ monthly users with business discovery, payments, and location-based filtering.
- Implemented interactive Leaflet.js maps with coordinate-based filtering across 8 city zones to improve local search and discovery.
- Improved SEO and streamlined CI/CD deployment workflows for faster and more reliable releases.

MARKO | *Next.js 15, React 19, TypeScript, Supabase, Tailwind CSS, OpenRouter* Mar. 2026 – Present

- Architected and developed a content operations platform for creators and agencies, centralizing publishing workflows with secure authentication and real-time synchronization via Supabase.
- Built core modules including a multi-platform post composer with live previews, visual content calendar, script manager, and analytics dashboards.
- Developed an AI-powered retrieval and recommendation system using OpenRouter and Qwen models, enabling semantic search over saved videos and natural-language content suggestions.

NBA Stats Predictor | *Python, Scikit-learn, MySQL, NBA API* Jan. 2025 – May 2025

- Developed a Random Forest model to forecast NBA game outcomes using historical and real-time performance data, with a data pipeline to extract, clean, and transform NBA API data, including player efficiency and advanced team metrics
- Built an interactive dashboard to visualize predictions, player rankings, and live game statistics for data-driven analysis.

Education

Universidad de las Americas Puebla (UDLAP) Puebla, Mexico
B.S. in Computer Systems Engineering | GPA: 3.7/4.0 *Aug. 2023 – May 2027*

Awards

COPARMEX Startup Forum Finalist 2026
BANXICO Hackathon 2025
Bitwise & Hackztecs Competitive Programming 2025

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL, Java, HTML/CSS
Frontend: React, Next.js, Tailwind CSS, Framer Motion
Backend / Databases: Node.js, Django, PostgreSQL, MySQL, Prisma, Supabase, Redis, Celery, PgBouncer
AI / Data: OpenRouter, OpenAI, Anthropic, LLM routing, OCR workflows, Pandas, NumPy, Scikit-learn
DevOps / Tools: Git, Railway, REST APIs, Webhooks, CI/CD, authentication systems, LaTeX
Languages Spoken: Spanish (Native), English (TOEFL 85, B2), French (B2)
